

SPRAY-007™

**SURFACTANT – PENETRANT
DEPOSITION AID - ACIDIFER**

Spray-007™ provides more uniform coverage by decreasing surface tension of spray solutions, thus aiding in penetration. It may be used as an acidifying agent to lower pH of spray solutions, thus preventing alkaline hydrolysis of pesticides sensitive to high pH. SPRAY-007 may be used on agricultural, aquatic, forestry, turf and ornamental, industrial, structural and non-cropland sites.

KEY FEATURES

- NPE-Free surfactant formulation promotes uniform coverage of spray droplets
- Improves uptake and serves as a deposition aid
- Acidifier protects chemistries that are sensitive to high pH water sources
