

SPRAY-SLICK®

A UNIQUE BLEND OF HIGHLY REFINED AND MODIFIED SPRAY OIL AND NONIONIC ORGANO-MODIFIED SILICONE SURFACTANT

The unique chemistry of Spray-Slick® allows for enhanced wetting and absorption of those pesticides or products, which labels recommend the addition of a spray adjuvant to improve performance. The addition of Spray-Slick to a spray tank solution will improve a spray application by physically modifying the wetting and spreading characteristics, the result being a more uniform spray deposit.

KEY FEATURES

- Methylated Seed Oil (MSO) to aid in penetration through the leaf tissue
- Improves spray application by physically modifying the wetting and spreading characteristics of the spray droplet
- Provides a more uniform spray deposit for improved uptake by the plant
