DIRECTIONS FOR USE

Shake container before use!

BIOKELP® 0-0-1 can be applied throughout the growing season to cool and warm season grasses, trees, and ornamentals. This product is intended to supplement a regular fertilization program. BIOKELP® 0-0-1 will not, by itself, provide all the nutrients normally required by plants.

BIOKELP® 0-0-1 is compatible with many products when added to a tank mix. If compatibility is uncertain, perform a jar test. **For best results, always add BIOKELP® 0-0-1 to the tank first and allow to agitate thoroughly before adding other products.**

TURF

	fl. oz. / 1,000 ft ²	Quarts / Acre
Greens and Tees	0.75 - 3.0 fl. oz.	1.0 - 4.0 qts.
Fairways and Other Turf	0.37 - 1.5 fl. oz.	0.5 - 2.0 qts.

Use sufficient water for good coverage (e.g. 1 - 2 gallons / 1,000 ft² or 45 - 90 gallons / acre) every 2 - 4 weeks throughout the growing season. Best results when the first application of BIOKELP® 0-0-1 is applied on actively growing turf. Frequent light applications are typically more effective than infrequent heavy applications.

For Ornamentals, mix BIOKELP® 0-0-1 at rates listed above and spray to runoff.
